

The Search Engine for Renewable Energy and Energy Efficiency

Access to the latest high quality information on renewables, energy efficiency and climate change is fundamental to the acceleration of the clean energy marketplace, facilitating investments, promoting new legislation and regulations and broadening interest and knowledge in the sector.

reegle (www.reegle.info) acts as a unique state-of-the-art search engine, targeting specific stakeholders including governments, project developers, businesses, financiers, NGOs, academia, international organizations and civil society.

reegle in Focus

reegle's information gateway provides information and data on all the various sub-sectors within sustainable energy at a global level including:

- Jurisdiction and laws
- News and announcements
- Political declarations and discussion papers
- Project activity and financial reports
- Statistical data
- Studies, manuals and reports
- Tenders, grants and bids

Unrivaled in its field, reegle's experienced team of internal experts identify and review all sources to ensure optimum quality control and currently feature over 260 websites. Strong links to the existing databases of core 'Knowledge Partners' such as the World Bank, IEA and UNIDO have also been established, broadening the overall information offering.

Utilising an intelligent search mechanism to refine and categorise all identifies information sources, reegle translates these via searchable use-friendly features into the user's search requirements.

reegle has also developed an Actors Catalogue, a directory of organisations involved in clean energy. It contains information on (and links to) more than 1500 initiatives, partnerships and organisations involved in relevant fields. The Catalogue also includes information about the focus, geographical reach and projects of the various Actors.

As an ever evolving enterprise, reegle has recently introduced a frequently updated blog, developed strong co-operations with carefully chosen conference partners and produced multi-lingual options in French and Spanish. Exciting new features are also in development including a map based geoweb project and a cutting edge technological design review.

Who is behind reegle ?

reegle (www.reegle.info) is a joint product of REEEP (the Renewable Energy and Energy Efficiency Partnership - www.reep.org) and REN21 (the Renewable Energy Policy Network of the 21st Century - www.ren21.net).

It is funded by:

- the British Department for Environment, Food and Rural Affairs (DEFRA),
- the Dutch Ministry of Housing, Spatial Planning and the Environment (MINVROM),
- the Federal Ministry for the Environment, Nature Conservation and Nuclear Safety of Germany (BMU)
- the Austrian Federal Ministry of Agriculture, Forestry, Environment and Water Management (Lebensministerium).
