

www.reeep.org

The Renewable Energy and Energy Efficiency Partnership (REEEP) is a public-private partnership launched at the Johannesburg World Summit in 2002. The REEEP aims to accelerate the global marketplace for energy efficiency and renewable energy by actively facilitating financing mechanisms for sustainable energy projects and structuring policy initiatives for clean energy markets on the ground.

www.ren21.net

The Renewable Energy Policy Network for the 21st Century (REN21) is a global policy network aimed at providing a forum for international leadership on renewable energy. Its goal is to allow the rapid expansion of renewable energies in developing and industrial countries by bolstering policy development and decision making on sub-national, national and international levels.

Partners

reegle is a joint project of REEEP and REN21. It is supported by the British Department of the Environment, Food & Rural Affairs (DEFRA); the Federal Ministry for the Environment, Nature Conservation and Nuclear Safety of Germany (BMU); the Dutch Ministry of Housing, Spatial Planning and the Environment (MINVROM) and the Austrian Federal Ministry of Agriculture, Forestry, Environment and Water Management (BMLFUW).

www.reegle.info

WHAT is reegle?

reegle is a one stop shop search engine for information about renewable energy & energy efficiency including:

- Laws and regulations
- News and announcements
- Political declarations and discussion papers
- Project, activity and financial reports
- Statistical data
- Studies, manuals and reports
- Tenders, grants and bids

reegle utilises the best available databases including key knowledge partners such as the World Bank, IEA and UNIDO to provide:

- Up-to-date information
- Global coverage
- Specific country details

WHY use reegle?

reegle – the information gateway for renewable energy and energy efficiency:

- Covers high-quality sources which are reviewed by internal experts
- Features an intelligent search mechanism to broaden/narrow the scope of the search
 - Uses state of the art 'knowledge-mapping' technology based on real experts' usage patterns to provide focused search results
 - Contains multilingual options (English, French and Spanish)
 - Presents the latest news and events (including a frequently updated blog)
 - Explains energy terms with its built-in glossary
 - Offers information pages for important events
 - Connects stakeholders by providing organisation details via the reegle Actors Catalogue

|| Fundamental to the acceleration of the clean-energy marketplace, is the need to provide interested stakeholders, in particular potential investors, with fast access to high quality information. reegle, the information gateway for renewable energy and energy efficiency, provides the means to link and disseminate knowledge, helping to determine market potential and facilitating global investment forecasts. ||

Dr. Martin Schöpe,

Head of Division KI I 4, International Affairs Energy and Environment, Project-based Instruments

|| The reegle Actors Catalogue is an invaluable source for facilitating networking and collaboration within the clean-energy field and for helping to promote project development through bringing together interested parties from government agencies to manufacturers. ||

Wang Zhongying,

Director, Center for Renewable Energy Development (CRED) China

|| Project finance is entirely dependent on a detailed understanding of the market conditions within the relevant country. reegle provides a comprehensive overview of these parameters including laws and regulations, up-to-date political standpoints, statistical data and best practice guides within the area, helping to guide and inform the decision-making process. ||

Debashish Majumdar,

Chairman & Managing Director, Indian Renewable Energy Development Agency Limited
